

NATIONAL CENTER ON Early Childhood Quality Assurance

QRIS 101: Everything You Want to Know About QRIS but Are Afraid to Ask

QRIS National Conference
July 16, 2018

Welcome and Introductions

Objectives

- ◆ Increase understanding of QRIS at the national and state levels
- ◆ Explore common QRIS elements and gain knowledge about state approaches
- ◆ Discuss QRIS trends and innovations

Myth Busters!

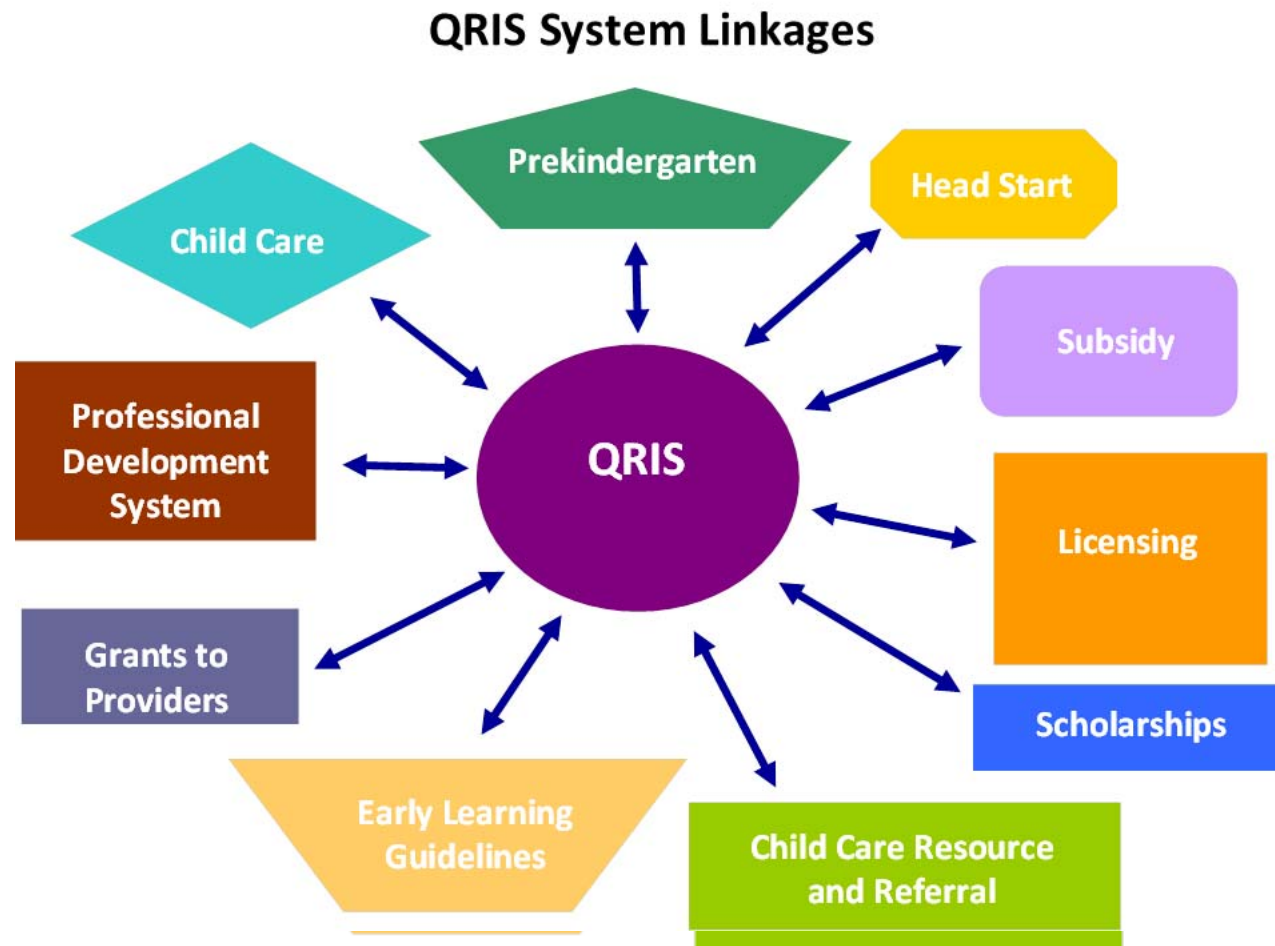

What Is a QRIS?

- ◆ Is a **systematic framework** for evaluating, improving, and communicating the level of quality in early and school-age care settings
- ◆ Builds on a foundation of licensing
- ◆ Has multiple steps or levels of increasing standards
- ◆ Offers support and incentives for reaching higher levels
- ◆ Provides easily recognizable symbols for consumer education

System Alignment

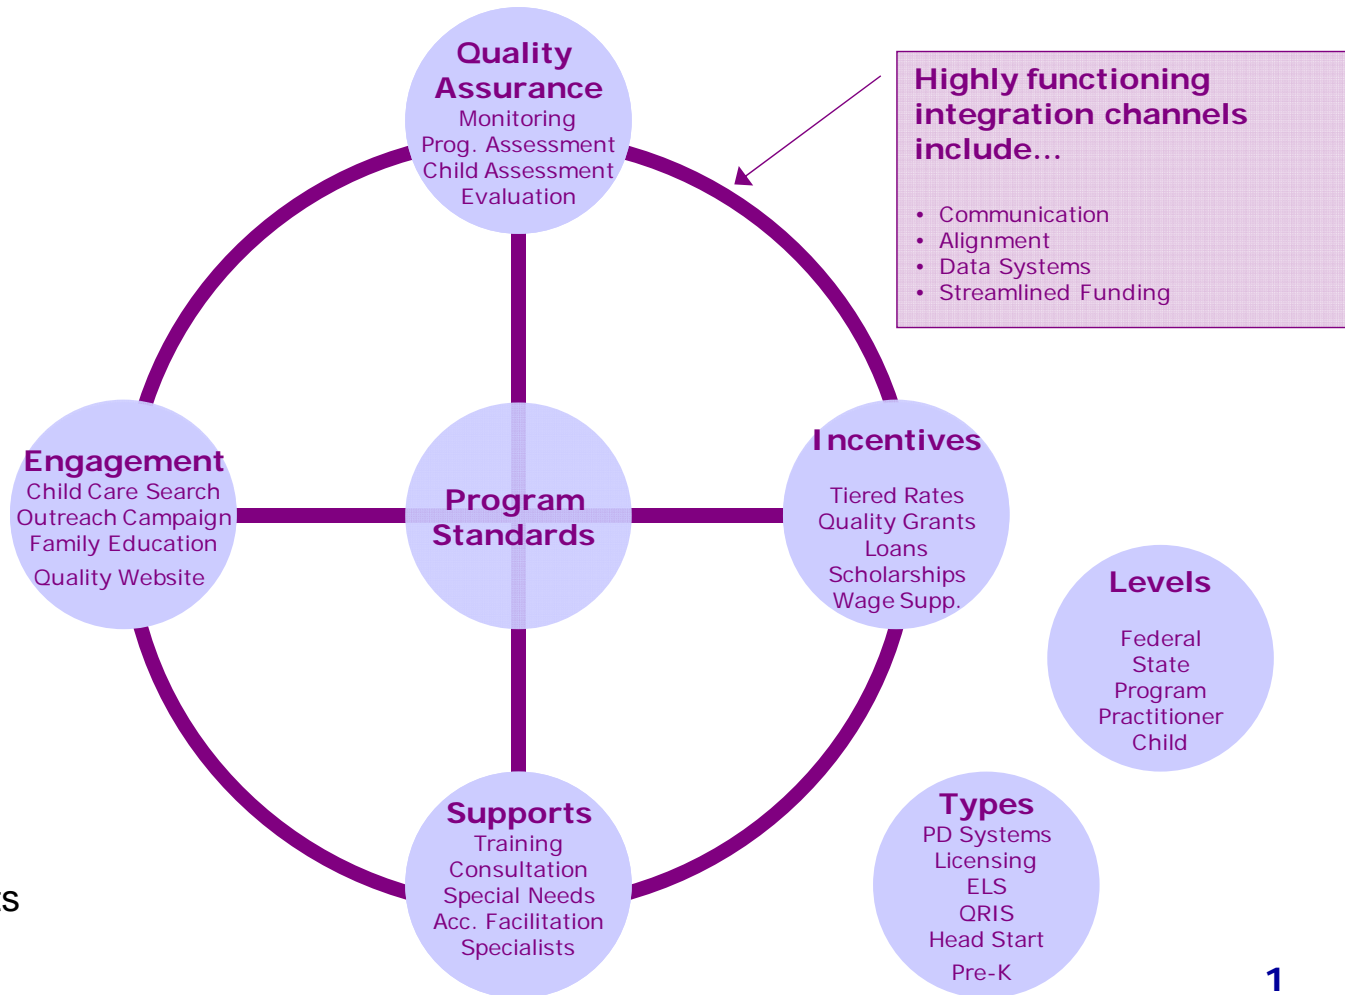

Why Develop a QRIS?

- ◆ Creates **alignment**:
 - between licensing, subsidy, and quality; and
 - across child care, prekindergarten, and Head Start.
- ◆ Links **supports and initiatives** to a specific quality framework.
- ◆ Provides an **accountability measure** for funding and quality initiatives.

Quality Elements Integration

Source: National Child Care Information Center. (2010). A Profile of Current State Efforts to Improve Quality. Washington, DC: Office of Child Care.

Why Develop a QRIS?

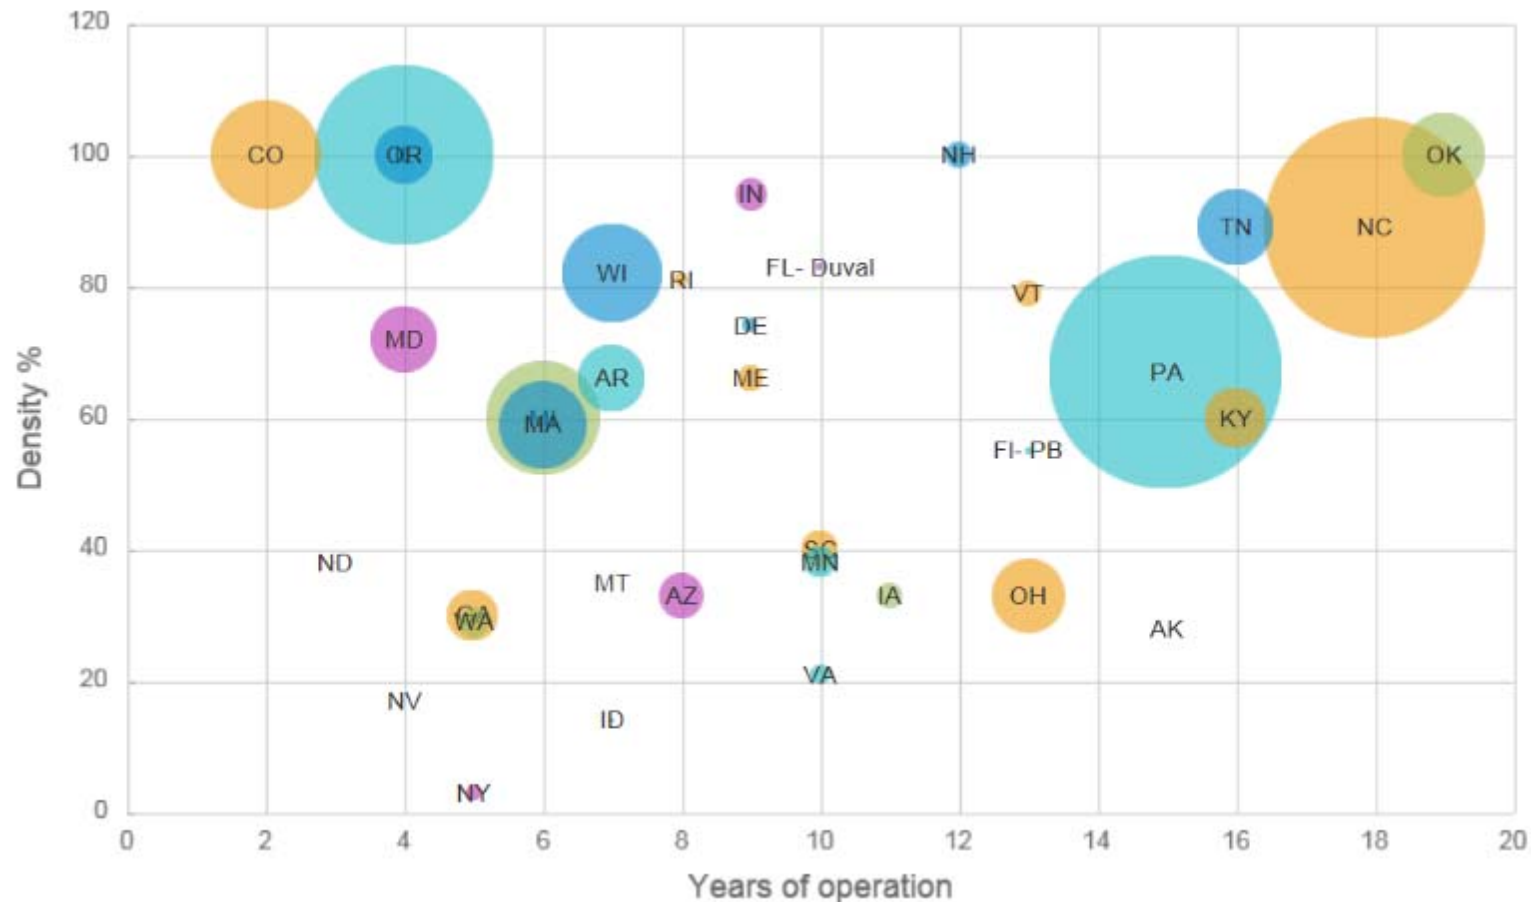

- ◆ The overall goal is to increase the quality of programs through **system-wide improvements**.
- ◆ A QRIS has the opportunity to do the following:
 - Increase quality of care for **children**;
 - Increase **parents'** understanding of and demand for higher-quality care; and
 - Increase professional development for **child care providers**.

QRIS Growth Over the Past 19 Years

Source: The Build Initiative & Child Trends. (2016). QRIS compendium: Top ten questions about QRIS: What is the pace of QRIS growth over the past 18 years? Retrieved June 3, 2018, from <http://qriscompendium.org/top-ten/question-1>

Participation Density

Source: The Build Initiative & Child Trends. (2016). QRIS compendium: Top ten questions about QRIS: What is the density and amount of center-based ECE program participation by years of QRIS operation? Retrieved June 3, 2018, from <http://qriscompendium.org/top-ten/question-6>

Mission and Goals of QRIS

WHAT ARE THE MISSION AND GOALS OF QRIS?

+ Show

Source: The Build Initiative & Child Trends. (2016). QRIS compendium: Top ten questions about QRIS: What are the mission and goals of QRIS? Retrieved June 3, 2018, from <http://qriscompendium.org/top-ten/question-8>

Foundation of Licensing

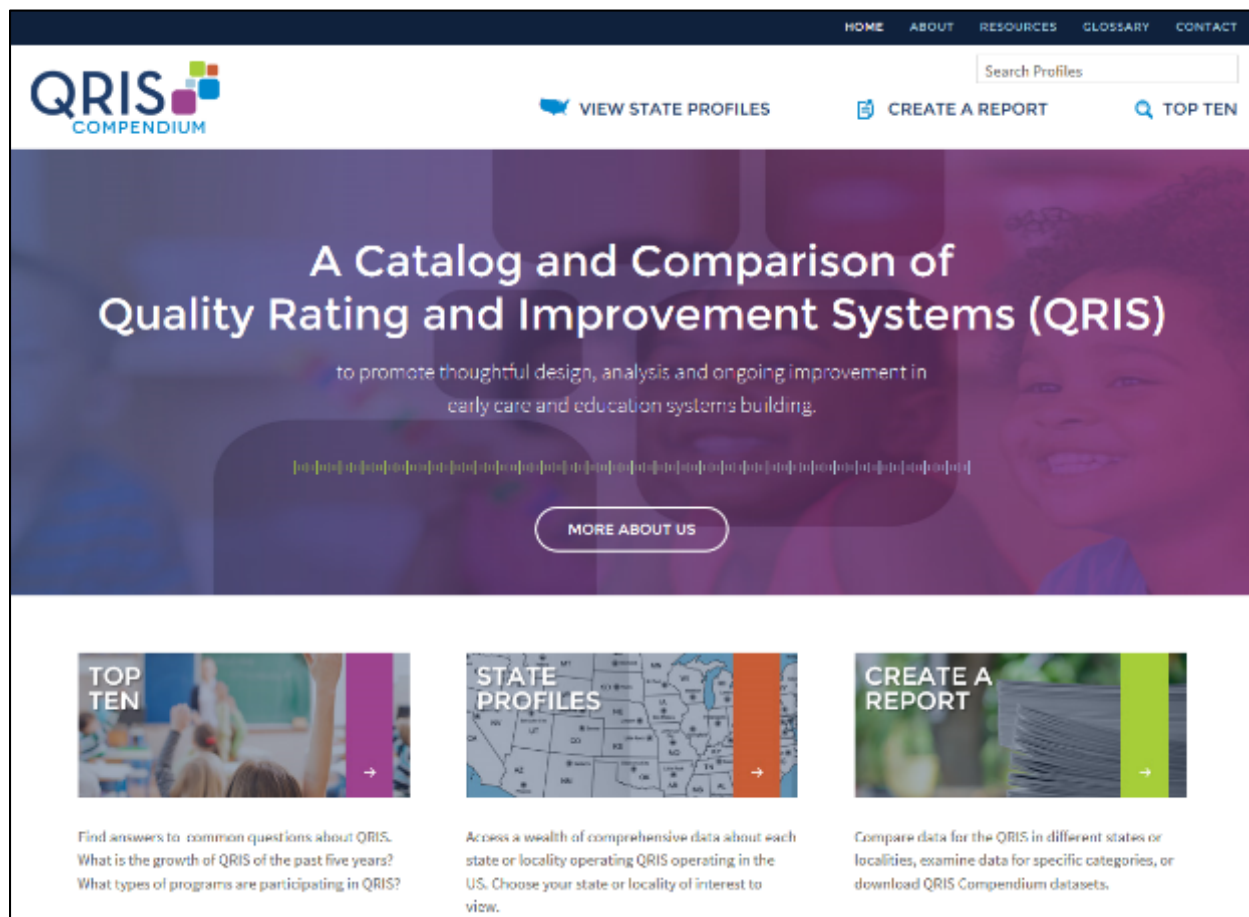

HOW DOES LICENSING DIFFER BY CENTERS AND HOMES?

Licensing data for Centers and Homes

Licensing indicators	Centers	Homes
Licensing required for enrollment	85%	88%
Process for license-exempt programs	41%	20%
Licensing equivalent to the first QRIS level	56%	44%

Source: The Build Initiative & Child Trends. (2016). QRIS compendium: Top ten questions about QRIS: How does licensing differ by centers and homes? Retrieved June 3, 2018, from <http://qriscompendium.org/top-ten/question-5>

QRIS Compendium

QRIS Structure and Participation

- ◆ The QRIS structure determines the participation pathway.
 - The QRIS standards are what is measured or assessed.
- ◆ QRIS participation refers to who is eligible.
- ◆ Determined by the following:
 - Pilots and field tests;
 - Stakeholder feedback;
 - Legislative priorities;
 - Research; and
 - System capacity and infrastructure.

Approaches to QRIS Structure

- ◆ **Building block approach:** All standards in each level must be met for programs to move to the next level
- ◆ **Point system:** Every standard is assigned a number of points, and a combined score is used to determine the quality rating
- ◆ **Hybrid/combination approach:** Combination of the two approaches above, often with building blocks for lower levels and points for higher levels

Advantages and Disadvantages

Building Block

- ◆ Easy to see what standards a program has met
- ◆ Consistent standards for all
- ◆ May have fewer indicators
- ◆ If indicators at lower levels are difficult to reach, this can halt program movement up the levels

Point System

- ◆ Not as transparent; rating level alone doesn't reveal which indicators are met
- ◆ Programs may attain points with standards not as critical to program quality
- ◆ More flexibility for programs
- ◆ Often there are many indicators to verify

Combination/Hybrid

Combines advantages and disadvantages of both

State Approaches

- ◆ **Building block** = 19 systems
- ◆ **Point system** = 7 systems
- ◆ **Combination/hybrid approach** = 18 systems

Source: The Build Initiative & Child Trends. (2016). A catalog and comparison of quality rating and improvement systems. Retrieved June 7, 2018, from <http://qriscompendium.org/>

Block Structure

All standards in each level must be met for programs to move to the next level.

- ◆ Arkansas
- ◆ Alaska
- ◆ Florida – Miami Dade
- ◆ Florida – Palm Beach
- ◆ Idaho
- ◆ Illinois
- ◆ Indiana
- ◆ Kentucky
- ◆ Maine
- ◆ Maryland
- ◆ Massachusetts
- ◆ Montana
- ◆ New Hampshire
- ◆ New Mexico
- ◆ North Dakota
- ◆ Oklahoma
- ◆ Oregon
- ◆ Rhode Island
- ◆ Virginia

Example of a Block Structure: Maine

 Center Based Child Care Programs				
Standards	To Attain and Maintain Step One	To Attain and Maintain Step Two	To Attain and Maintain Step Three	To Attain and Maintain Step Four
Compliance History/ Licensing Status	1. Facility meets regulatory standards. 2. Facility is in operation for less than one year cannot apply to the Quality Rating System (QRS).	1. Program is in compliance with licensing regulations. 2. The facility has no substantiated serious violations in the past year.	1. Program is in compliance with licensing regulations. 2. The facility has no substantiated serious violations in the past three years.	1. Program is in compliance with licensing regulations. 2. The facility has no substantiated serious violations in the past three years.
Learning Environment/ Curriculum	1. Facility meets regulatory standards. 2. Facility is in operation for less than one year cannot apply to the Quality Rating System (QRS).	1. The curriculum guides the development of a daily schedule that is predictable yet flexible and responsive to the individual needs of children. The schedule provides time and support for attention, social interaction and outdoor experiences and is responsive to the child's need to rest or to move. (Maine Department of Health and Human Services, 2014) 2. The program has a written method for curriculum planning that includes planning for children's interests and skills. 3. Each program site has a teacher or staff member responsible for educational programming for children's interests and skills.	1. The curriculum guides the development of a daily schedule that is predictable yet flexible and responsive to the individual needs of children. The schedule provides time and support for attention, social interaction and outdoor experiences and is responsive to the child's need to rest or to move. (Maine Department of Health and Human Services, 2014) 2. The program has a written method for curriculum planning that includes planning for children's interests and skills. 3. Each program site has a teacher or staff member responsible for educational programming for children's interests and skills.	1. The curriculum guides the development of a daily schedule that is predictable yet flexible and responsive to the individual needs of children. The schedule provides time and support for attention, social interaction and outdoor experiences and is responsive to the child's need to rest or to move. (Maine Department of Health and Human Services, 2014) 2. The program has a written method for curriculum planning that includes planning for children's interests and skills. 3. Each program site has a teacher or staff member responsible for educational programming for children's interests and skills.
Program Inclusion		1. The program provides an opportunity to identify strengths and weaknesses and a member of staff, administrator and teacher. A written plan for improvement based on the evidence prior to steps in the portfolio that made available for the on-site review.	1. The program is evaluated using a self-assessment tool (Self-assessment tool) to identify strengths and weaknesses and a member of staff, administrator and teacher. A written plan for improvement based on the evidence prior to steps in the portfolio that made available for the on-site review.	1. The program is evaluated using a self-assessment tool (Self-assessment tool) to identify strengths and weaknesses and a member of staff, administrator and teacher. A written plan for improvement based on the evidence prior to steps in the portfolio that made available for the on-site review.
Staffing and Professional Development	1. 100% of staff members are registered in Maine (Maine Department of Health and Human Services, 2014)	1. All lead teachers are at a level 3 or above on the MQCTQ Career Ladder. 2. All staff attend staff meetings on a monthly basis.	1. All lead teachers are at a level 3 or above on the MQCTQ Career Ladder and meet MQCTQ continuing education requirements and provide appropriate documentation verifying continuing education. All staff have a professional development plan prepared annually and, in the case of professional growth activities per year, are above the regulatory minimum.	1. All lead teachers are at a level 4 or above on the MQCTQ Career Ladder and meet MQCTQ continuing education requirements and provide appropriate documentation verifying continuing education. All staff have a professional development plan prepared annually and, in the case of professional growth activities per year, are above the regulatory minimum.
Administrative Policies and Procedures		1. The program has an employee handbook detailing policies for at least the following: hiring and firing, advancement, grievance, equal treatment, and child abuse reporting. (MAINEVC 10.1.1.1) 2. All staff are evaluated at least annually by an appropriate supervisor. (MAINEVC 10.1.1.1) 3. The program has a handbook that includes the handbook requirements within hiring and the following policies and procedures: attendance, discipline, health and safety, and holidays. (MAINEVC 10.1.1.1)	1. The program has an employee handbook detailing policies for at least the following: hiring and firing, advancement, grievance, equal treatment, and child abuse reporting. (MAINEVC 10.1.1.1) 2. All staff are evaluated at least annually by an appropriate supervisor. (MAINEVC 10.1.1.1) 3. The program has a handbook that includes the handbook requirements within hiring and the following policies and procedures: attendance, discipline, health and safety, and holidays. (MAINEVC 10.1.1.1)	1. The program has an employee handbook detailing policies for at least the following: hiring and firing, advancement, grievance, equal treatment, and child abuse reporting. (MAINEVC 10.1.1.1) 2. All staff are evaluated at least annually by an appropriate supervisor. (MAINEVC 10.1.1.1) 3. The program has a handbook that includes the handbook requirements within hiring and the following policies and procedures: attendance, discipline, health and safety, and holidays. (MAINEVC 10.1.1.1)
Physical/Healthy Environment		1. The program has a written philosophy about the relationship between the parent and the program, which is shared with parents when their children are enrolled. (MAINEVC 10.1.1.1)	1. The program has a written philosophy about the relationship between the parent and the program, which is shared with parents when their children are enrolled. (MAINEVC 10.1.1.1)	1. The program has a written philosophy about the relationship between the parent and the program, which is shared with parents when their children are enrolled. (MAINEVC 10.1.1.1)
Family Resources		1. The program makes families aware of local and state resources available to them. These resources may include: Transition First Steps Clinic, Child Development Services, Maine Parent Information, New Brunswick, local community center, etc. Ways to inform parents of these resources may include: parent resource library, bulletin board, conference packet, etc. (MAINEVC 10.1.1.1)	1. The program makes families aware of local and state resources available to them. These resources may include: Transition First Steps Clinic, Child Development Services, Maine Parent Information, New Brunswick, local community center, etc. Ways to inform parents of these resources may include: parent resource library, bulletin board, conference packet, etc. (MAINEVC 10.1.1.1)	1. These resources may include: Transition First Steps Clinic, Child Development Services, Maine Parent Information, New Brunswick, local community center, etc. Ways to inform parents of these resources may include: parent resource library, bulletin board, conference packet, etc. (MAINEVC 10.1.1.1)
Assessment		1. Evidence is collected 3 times per year on children's development in the following areas: • Social Interaction • Cognitive • Physical (gross and fine motor) development • Communication 2. Examples of evidence include: children's work, observations, interviews with families, audio tape, video tape, photographs. This evidence is incorporated in curriculum planning. 3. For programs serving infants and toddlers, the observations are linked to supporting parent's interest and confidence in the learning and development (10.1.1.1) and for programs serving children 3-5 years, the observations are linked to Maine's Early Childhood Learning Guidelines (10.1.1.1) which are used as a guide for planning.	1. Evidence is collected 3 times per year on children's development in the following areas: • Social Interaction • Cognitive • Physical (gross and fine motor) development • Communication 2. Point Structure

Every standard is assigned a number of points, and a combined score is used to determine the quality rating.

- ◆ Georgia
- ◆ Louisiana
- ◆ Michigan
- ◆ New York
- ◆ North Carolina
- ◆ Vermont
- ◆ DC

Example of a Point Structure: New York

Standards Guide & Resources

Center-Based Standards

[Select Different Standards](#)

Learning Environment	Family Engagement	Qualifications and Experience	Management and Leadership
Classroom Environment			
Code	Indicator	Points	Documentation
CE-1	Program administrative staff attends training on the Environment Rating Scales (ERS).	2	<input type="checkbox"/> Evidence in Aspire that at least 1 administrator has attended the relevant training within the previous 15 months, verified with Training Certificate
CE-2	Program completes an ERS self-assessment using the appropriate scale(s) and writes an improvement plan to address subscale scores below 3.25.	8	<input type="checkbox"/> Completed ERS self-assessment report stating overall score and subscale scores. If applicable, include improvement plan
CE-3	Program has an independent ERS assessment and achieves an overall score of 4.25 - 4.99. Written improvement plan for subscale scores below 3.50.	30	<input type="checkbox"/> Completed ERS report(s) is automatically sent to QUALITYstarsNY
CE-4	Program has an independent ERS assessment using the appropriate scale(s) and achieves an overall score of 5.00 - 5.49. Written improvement plan for subscale scores below 4.50.	40	<input type="checkbox"/> Completed ERS report(s) is automatically sent to QUALITYstarsNY
CE-5	Program has an independent ERS assessment using the appropriate scale(s) and achieves an overall score of 5.50 or higher. Written improvement plan for subscale scores below 4.50.	50	<input type="checkbox"/> Completed ERS report(s) is automatically sent to QUALITYstarsNY

Source: New York Early Childhood Professional Development Institute, QUALITYstarsNY Coordinating Agency. (n.d.). *Guide to the center-based standards*. Retrieved April 5, 2017, from http://qualitystarsny.org/standardsguide/std_list.php?pop=722

Hybrid/Combination Structure

Combination of the two approaches, often with building blocks for lower levels and points for higher levels. Some States have mandatory standards and standards with point values.

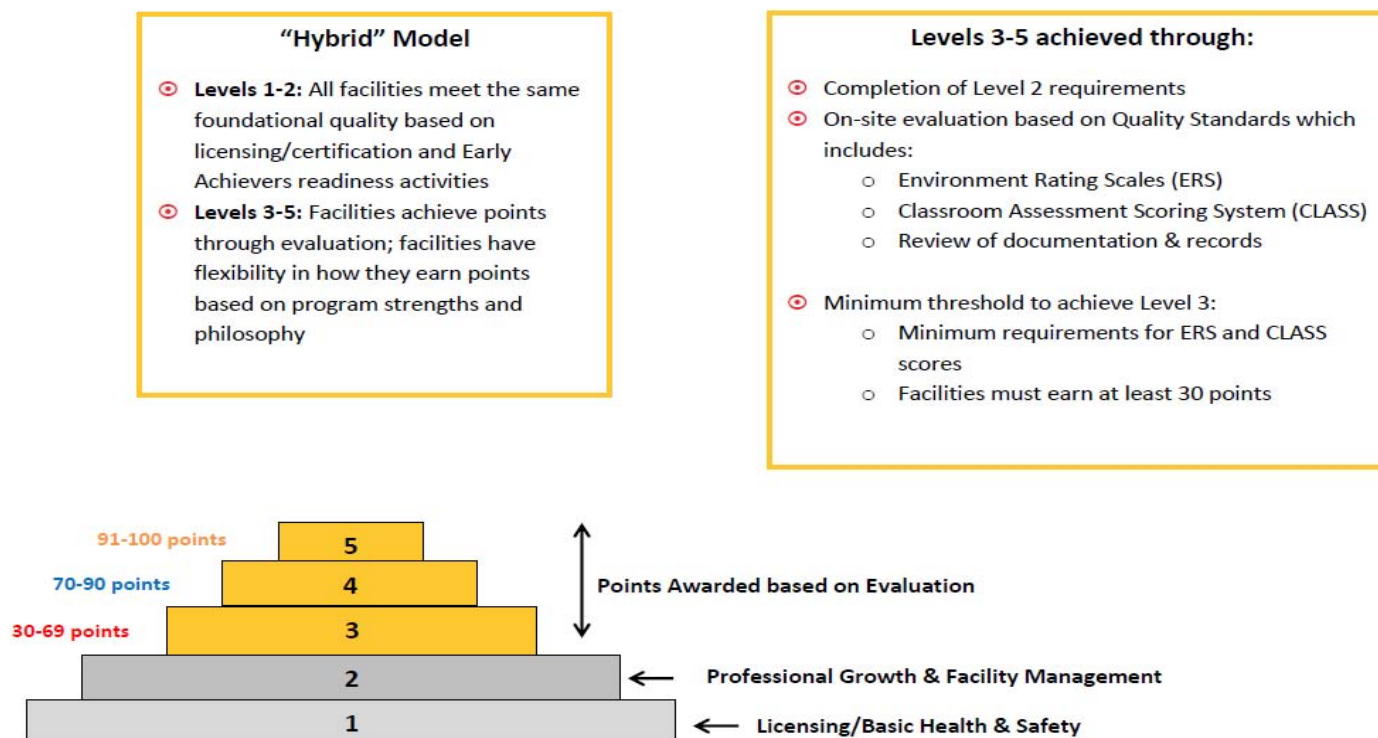

- ◆ Arizona
- ◆ California
- ◆ Colorado
- ◆ Delaware
- ◆ Florida – Duval
- ◆ Iowa
- ◆ Minnesota
- ◆ Nebraska
- ◆ Nevada
- ◆ New Hampshire
- ◆ New Jersey
- ◆ Ohio
- ◆ Pennsylvania
- ◆ South Carolina
- ◆ Tennessee
- ◆ Texas
- ◆ Utah
- ◆ Washington
- ◆ Wisconsin

Example of a Hybrid Structure: Washington

Washington's Quality Standards: An Overview

Source: Washington Early Achievers. (n.d.). Washington's quality standards: An overview. Retrieved April 5, 2017, from https://www.del.wa.gov/sites/default/files/imported/publications/elac-gris/docs/EA_quality_standards_overview.pdf

Number of Levels in QRIS

- ◆ 6 QRIS have 3 levels
- ◆ 11 QRIS have 4 levels
- ◆ 25 QRIS have 5 levels
- ◆ 2 QRIS have 6 levels

Source: The Build Initiative & Child Trends. (2016). A catalog and comparison of quality rating and improvement systems. Retrieved June 3, 2018, from <http://qriscompendium.org/>

Voluntary vs. Mandatory Participation

- ◆ Most systems are voluntary.
- ◆ Mandatory participation is becoming more common:
 - By funding stream;
 - By law; and
 - By regulation.

Element 1: Quality Standards

Standards should be:

- ◆ achievable;
- ◆ measurable;
- ◆ evidence based; and
- ◆ understandable.

Standards Criteria: Achievable

Expense

Time

Standards Criteria: Feasible to Measure and Manage

- ◆ Monitoring
- ◆ Technical assistance
- ◆ Financial supports
- ◆ Other supports

Standards Criteria: Other Considerations

- ◆ Be flexible and honor multiple approaches and pedagogies
- ◆ Measure universal elements of quality
- ◆ Align with other standards
- ◆ Align with state investments and priorities

Quality Standards: A National Picture

Indicators	Center-Based ECE	Home-Based ECE
N=	40	39
Staff qualifications and training	95%	95%
Environment	90%	95%
Program administration, management, and leadership	83%	83%
Curriculum	81%	78%
Family partnerships and engagement	79%	78%
Interactions	71%	73%
Health and Safety	69%	66%
Child assessment	67%	68%
Ratio and group size	57%	59%
Community involvement	52%	49%
Provisions for children with special needs	50%	59%
Other	40%	34%
Accreditation	38%	27%
Staff compensation and benefits	21%	--

Source: The Build Initiative & Child Trends. (2016). QRIS compendium: Top ten questions about QRIS: What are the most common types of indicators included in QRIS? Retrieved June 3, 2018, from <http://qriscompendium.org/top-ten/question-4>

National Observation Tools

- ◆ Environment rating scales
- ◆ Classroom Assessment Scoring System
- ◆ Program Administration Scale/Business Administration Scale
- ◆ Program Quality Assessment
- ◆ Others

Most Commonly Used Observation Tools

WHAT WERE THE MOST COMMONLY USED TOOLS TO OBSERVE PROGRAM QUALITY?

ERS - 45%
CLASS - 33%
Other - 12%
Self-developed/ home grown tool - 6%
No observational tool used - 4%

ERS - 63%
Other - 12%
CLASS - 11%
Self-developed/ home grown tool - 8%
No observational tool used - 6%

Source: The Build Initiative & Child Trends. (2016). QRIS compendium: Top ten questions about QRIS: What were the most commonly used tools to observe program quality? Retrieved June 3, 2018 from <http://qriscompendium.org/top-ten/question-3>

Observation Tools: Key Considerations

- ◆ What does it measure and how well?
- ◆ Does it address cultural considerations?
- ◆ Does it align or enhance QRIS standards?
- ◆ Can the tool be used for self-assessment?
- ◆ What kind of training will participants need? Coaches?
Technical assistance staff?
- ◆ What is the cost?
- ◆ What data are needed?

Trends in Quality Standards

- ◆ More frequent revisions
- ◆ Cross-walking standards
- ◆ Research basis for selected standards; data-driven changes to standards
- ◆ Fewer QRIS standards: “The few and the powerful.”
- ◆ Raising the bar on expectations (States melding lower levels into licensing and raising top levels)
- ◆ Hybrid or combination approaches

Operationalizing Quality Standards

- ◆ Providers need time to meet requirements
- ◆ QRIS partners and stakeholders need in-depth understanding of the standards
- ◆ It is important to establish and maintain consistent interpretation of the standards
- ◆ Standards will change and evolve—This is OK!
- ◆ Communication is key

NATIONAL CENTER ON

Early Childhood Quality Assurance

Financing and Financial Supports

Let's talk about financing.

It costs a lot to implement a QRIS. But what exactly are we paying for?

Accountability
and monitoring

Provider
support

Data collection
and evaluation

Public
awareness

What kind of funding can support the system?

Provider support

What motivates you to understand the cost to provide child care?

And what do we know about the costs to run a child care program?

What can child care providers do to improve the financial health of their programs?

What can policymakers do to improve the financial health of child care programs?

What are your next steps?

NATIONAL CENTER ON

Early Childhood Quality Assurance

Quality Assurance and Monitoring

Quality Assurance & Monitoring

Quality Assurance and Monitoring

- ◆ Objectively assessing program quality and assigning quality levels
- ◆ Using data to track program progress and children's participation by quality level
- ◆ Conducting classroom assessments
- ◆ Evaluating supports for effectiveness
- ◆ External reviewing and revising of standards and levels

Quality Assurance: Valid and Reliable Standards and Rating

- ◆ **Valid:** The standard measures what you are trying to measure
- ◆ **Reliable:** The standard gives the same result on a successive trial

Quality Assurance and Monitoring: Data Collectors and Raters

- ◆ Initially assessing program quality and assigning quality levels
- ◆ Conducting classroom assessments and program-level assessments
- ◆ Providing training and technical assistance
- ◆ Clarifying and communicating about how to apply standards
- ◆ Others

Efficiency in Monitoring

- ◆ Determining how many criteria or standards are needed
 - How are standards documented
- ◆ Determining how many onsite assessment tools will be used
 - At all levels or only higher levels
 - In all classrooms or some classrooms
 - In all settings or some settings
- ◆ Determining the length of rating
- ◆ Accepting status of programs from other systems or that have achieved accreditation

Efficiency in Monitoring

- ◆ For each QRIS standard or indicator, what is the source(s) of evidence?
 - Self-report
 - Self-assessment
 - Imported data from another system
 - Document submission (online or hard copy portfolio)
 - Observation

Trends in Quality Assurance and Monitoring

- ◆ Linkages with licensing
- ◆ Differential monitoring
- ◆ Coordinated monitoring
- ◆ Moving from 'rating' to 'recognition'
- ◆ Readiness tools or assistance
- ◆ Increased reliance on data systems
- ◆ Careful consideration of efficiencies
 - Staffing, number of criteria and assessments, reporting, automation

For more information see QRIS Resource Guide: Chapter 5
<https://qrisguide.acf.hhs.gov/index.cfm?do=section&sid=4>

Key Consideration

- ◆ Even a QRIS that appears simple can become complex and expensive to administer unless steps are taken to streamline documentation policies and onsite observation expectations for QRIS standards

NATIONAL CENTER ON

Early Childhood Quality Assurance

Continuous Quality Improvement

Continuous Quality Improvement

“One major purpose of a QRIS [quality rating and improvement system] is to recognize quality **and** promote a culture of continuous improvement among providers. ... The rating is not a destination; it is a set of benchmarks along a pathway of ongoing improvement.”

Anne Mitchell

Definition: CQI Is ...

- ◆ **Continuous:** Part of the job; no end point
- ◆ Owned by the team in a program
- ◆ Proactive, not reactive
- ◆ A **reflective, cyclical, and data-informed** process

Basically

◆ The process of

- identifying, describing, and analyzing strengths and weaknesses (via multiple sources of evidence);
- establishing a plan with benchmarks, timelines, assigned tasks, and responsibilities to improve;
- testing and implementing solutions; and
- evaluating the results and revising the plan

Why CQI

- ◆ It helps create compliance and a culture of improvement
- ◆ Not quality for a day
- ◆ It helps create a sustainable approach that raises the bar for early learning quality

Based on a shared vision of quality:

- Identify general goals and select team
- Analyze current condition using data
- Propose experiment; make plan
- Decide on measures of success

Plan

- Build staff capacity and carry out the plan
- Collect documentation and data

Do

Study

Act

- Adopt, modify, or abandon these practices
- Determine what more needs to be done and learned
- Set up next round

- Share and analyze impact, track results
- Consider adjustments
- Celebrate learning & successes

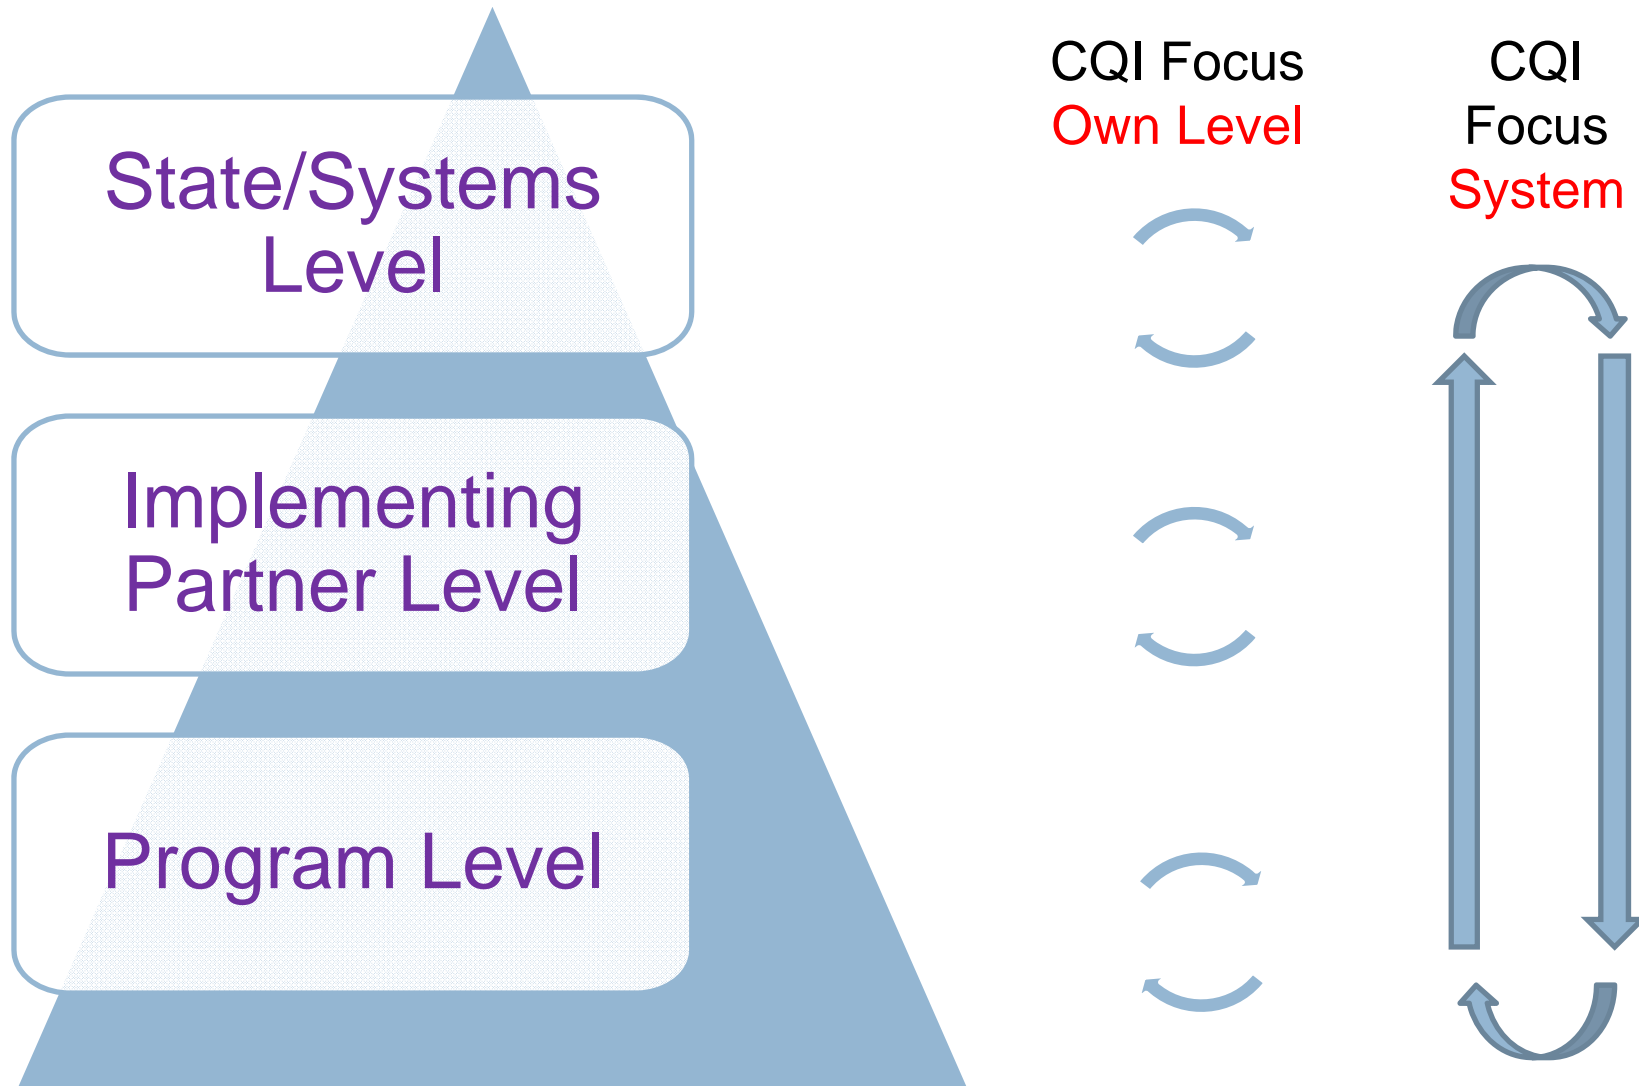

CQI in Existing QRIS

- ◆ Specific standards/criteria
- ◆ Part of technical assistance (TA) and program support
- ◆ Part of annual reporting/monitoring

Continuous Quality Improvement

- ◆ **CQI applies to three levels and different strategies are used at each level.**
 - **Program level** - program staff and leadership
 - **Implementing partner level** - professional development and technical assistance practitioners
 - **The state system level** - state agencies, statewide organizations, policymakers, private funders, and contracting entities

QRIS: Three 3 Levels of Work

CQI as a Standard in QRIS

- ◆ Program conducts a self-assessment or is assessed
- ◆ Quality improvement plans developed after an assessment
- ◆ Other sources of evidence and data are used to inform the QIP
- ◆ Quality improvement plans are used at all levels to track progress

How to Live CQI

- ◆ Use the continuous quality improvement model to make small, incremental changes
- ◆ CQI is most effective when it becomes a natural part of the way everyday work is done

“Change that lasts is slow and gradual.” - Kaizen

改善

Kai=Change Zen=Good

Why Is Readiness for Change Important?

“A one-size-fits-all approach that ignores differences in readiness to change may result in a waste of resources, lower program retention, and worse outcomes for educators and children.”

Peterson & Cairns 2012 p..2

What Are the Stages of Change?

- ◆ Stage 1: Precontemplation
- ◆ Stage 2: Contemplation
- ◆ Stage 3: Preparation
- ◆ Stage 4: Action
- ◆ Stage 5: Maintenance

Peterson & Cairns 2012 p..3

What Strategies Can Be Used at Each Stage of Change?

- ◆ Stage 1: Raise awareness
- ◆ Stage 2: Raise confidence and identify obstacles
- ◆ Stage 3: Set goals and gain commitment
- ◆ Stage 4: Assist with problem solving and resource identification
- ◆ Stage 5: Support integration of changes and team building

Peterson & Cairns 2012 p..3

Five Essential Supports Framework for Continuous Learning and Improvement

Definitions adapted with permission and collaboration from authors: Bryk, A., Sebring, P., Allensworth, E., Luppescu, S., and Easton, J. (2010). *Organizing Schools for Improvement: Lessons From Chicago*. Chicago: University of Chicago Press.

Slide 71

CL(1

Chun, Leatha (ACF), 6/4/2018

CL(2

This is a excellent slide and am interested in how you align/connect the 5 essential supports framework with the components/processes of CQI.

Chun, Leatha (ACF), 6/4/2018

Changing the Dynamic

- ◆ Externally driven and delivered professional development

- ◆ Internally driven and embedded continuous professional learning and improvement

- ◆ Focus on individual's knowledge and capacity

- ◆ Facilitate learning and build organizational capacity for effective teaching through inquiry-based approaches and reflective practice

Indicators of a Culture of Continuous Improvement

- ◆ Curiosity
- ◆ Reflection
- ◆ Tolerance
- ◆ Feedback
- ◆ Systems thinking

Designing Professional Development and Technical Assistance that Builds Capacity of Continuous Learning and Improvement

Building a Learning Organization

“The organizations that will truly excel in the future will be the organizations that discover how to tap people’s commitment and capacity to learn at all levels in an organization.”

Senge, P. M. (2006). *p.4*

Measuring CQI

- ◆ What does the research tell us?
- ◆ How can we measure the success of a CQI approach?
- ◆ What data are we collecting?
